

COMMITMENT TO PATIENT SAFETY

January 2018

CERTIFICATE OF PURCHASE

This office has purchased the DentaPure® cartridge for microbiological dental unit water line purification to ensure that it meets or exceeds water quality recommendations set forth by the Environmental Protection Agency (EPA) and adopted by the American Dental Association (ADA), Centers for Disease Control (CDC) and the Organization for Safety, Asepsis and Prevention (OSAP).

The DentaPure® cartridge installed in this office uses the same technology developed for NASA to ensure that water consumed in space is safe from harmful levels of bacteria.

DentaPure® cartridges provide safe, clean and compliant water for dental treatment.
